About Heavy Weather Avoidance...

“Chen and Chesneau merge the seamanship of a master mariner and the forecast expertise of a senior meteorologist, providing readers with double-barrel exposure to what actually goes on in the atmosphere and on the sea’s surface.”

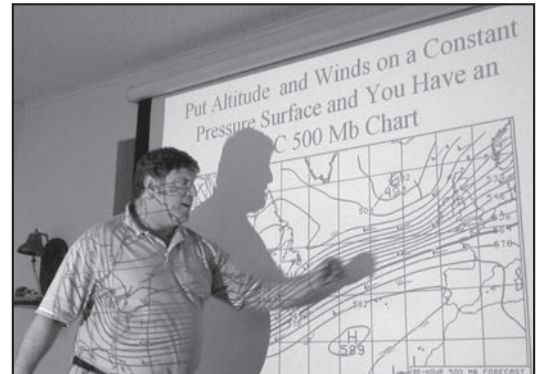

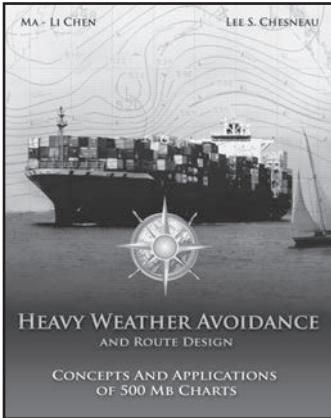

–From the foreword by Ralph Naranjo, Technical Editor Practical Sailor Magazine and U.S. Naval Academy Instructor

“Heavy Weather Avoidance and Route Design is an invaluable resource for all sailors and will serve as the ultimate reference on the 500 Mb chart.”

–Stan Honey, winning navigator on ABN AMRO One, of the 2005-2006 Volvo Ocean Race

“After studying this book, no mariner will ever look at the 500 Mb charts the way they used to. Captain Mike and Lee have made a valuable contribution to shipboard weather routing.”

–David Burch, director of Starpath School of Navigation, author of Modern Marine Weather
